EDUCATION

B.Sc. in Mechanical Engineering, Iran University of Science and Technology 2019 - 2024

Final project: Simulation of the process of separating solid particles from gas

GPA: 15.75 (out of 20)

RESEARCH INTERESTS

- energy conservation
- thermodynamics
- aerodynamics
- energy systems
- combustion
- hydrodynamics

WORK EXPERIENCE

HEATING, VENTILATION AND AIR CONDITIONING(HVAC) DESIGNER; FREELANCE

March 2024-*present*

- Load calculation in Carrier (HAP), determining mechanical equipment and drawing mechanical plans of buildings in AutoCAD or Revit using ASHRAE handbook

TECHNICAL SALES CONSULTANT; FULL-TIME

June 2024- August 2025

Tecla Group, Iran

- Consulting consumers to buy most efficient pumps and proper equipment related to pump system for their projects

HEATING, VENTILATION AND AIR CONDITIONING(HVAC) DESIGNER; FULL-TIME

October 2023-June 2024

Payborz Consulting Company, Iran

- Load calculation in Carrier (HAP), determining mechanical equipment and drawing mechanical plans of buildings in AutoCAD or Revit using ASHRAE handbook

RESEARCH AND DEVELOPMENT ENGINEERING INTERN

June 2021-September 2021

Mapna Turbine Engineering and Manufacturing Company, Iran

- Doing research on different loads on gas turbine blades

CERTIFICATES

- Heating, ventilation and air conditioning (HVAC) design, Sharif University of Technology Branch

PROJECTS

- Simulation of the process of separating solid particles from gas: Cyclone separators can be used to separate solid particles from the gas flow. One of the important performance indicators of cyclone separators is their efficiency, which shows the amount of separation of particles from the flow. In this project, by using Aspen Plus software, after determining thermodynamic data such as temperature and pressure, flow phase, particle type, flow rate and particle size, the required cyclone is designed. In order to separate solid particles from gas, two cyclones have been designed and the effect of input values on cyclone design has been investigated.

ENGLISH TEST

IELTS (Academic): 6.5(overall score)

Listening: 7.0, Writing: 6.0

Speaking: 7.0, Reading: 6.5

Test date: 11/29/2024

SOFTWARE SKILLS

- | | | |
|-----------------|--------------------|----------|
| ■ AutoCAD | ■ Aspen Plus | ■ MATLAB |
| ■ Carrier (HAP) | ■ Microsoft Office | |

HOBBIES

Social Media activities, editing videos, photography, watching movies
